## Armature Housing for Armlock® 261 and 262

## 'L' & 'Z' Brackets for Armlock® 261 and 262

## 'L' & 'Z' Brackets with Cover Plates for Armlock® 261 and 262

Adams Rite have a variety of brackets and housings which can be used with our Direct Pull Magnets

## Key Benefits

### Armature Housing for Armlock® 261 and 262

- For flush mounting of armature plate into timber door core
- Suits outward opening applications
- Rim armature housing: for situations where it is preferable to not drill a hole right through the door for the armature bolt (such as fire doors), the rim housing enables the armature plate to be installed on the surface of the door

### 'L' & 'Z' Brackets for Armlock® 261 and 262

- Adjustable 'L' bracket: suits typical outward opening door applications where there is not sufficient space to fit the magnet to the head of the door frame.

- 'L' & 'Z' Brackets: for conversion of Armlock® 260 series magnets to inward opening door applications, the 'L' & 'Z' bracket kit consists of a standard 'L' bracket and two separate fully-adjustable plates which form the 'Z' bracket

### 'L' & 'Z' Brackets with Cover Plates for Armlock® 261 and 262

- Brackets have architectural cover plates to improve the aesthetics of the application
- Armature housing allows magnet to be positioned closer to the door

## Related Hardware

### Armlock® 261 & 262

**Note:** "L&Z" Brackets with Cover Plates. Suitable for **new** installations only, **not** as a direct replacement for standard 'L' & 'Z' brackets.
