

4593 and 4593E

Standard and Electrified Latch Pull

The Adams Rite standard and electrified latch pull provide outside activation to an aluminium door fitted with a deadlatch or exit device.

The 4593 and 4593E is for use on standard 44.45mm aluminium, timber or steel doors.

Key Benefits

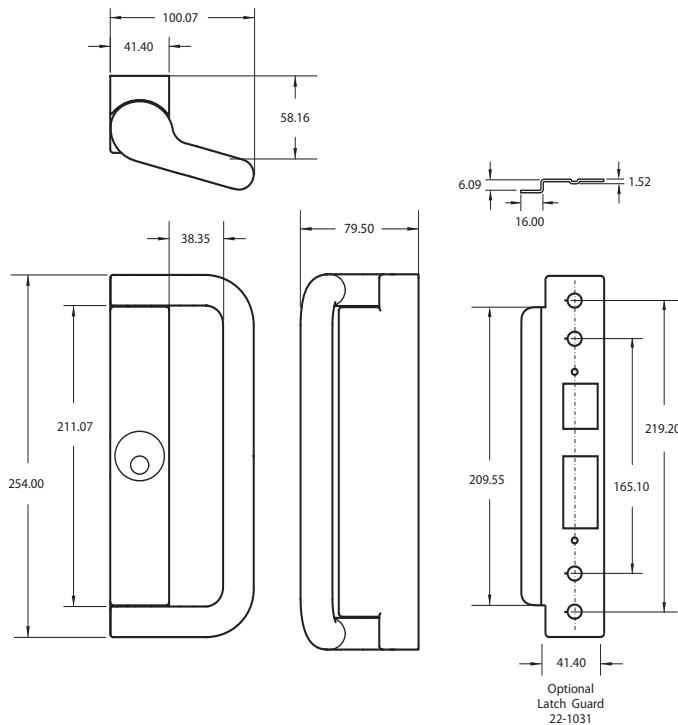

- Offers ease of use and greater flexibility for narrow, medium and wide aluminium doors with Adams Rite 4710/4910/4720/4920 Deadlatches and 930/940Series exit device Latches
- A simple pull of the handle unlatches the door, the handle is spring loaded to return to the centre
- By using the 4593E electrified version, the latch pull handle can be integrated with most access control systems and used with card readers, keypads and other access control devices
- Passage functionality on all models
- Suitable for use on aluminium, timber and steel doors
